

GENERAL INFORMATION

The Radiologic Technologist or Radiographer is a vital part of the Radiology Department and the health care team. Responsibilities include patient care, operating radiographic equipment, performing radiologic procedures and assisting the radiologist. Upon successful completion of the program, graduates are eligible to apply for admission to the certification exam administered by the American Registry of Radiologic Technologists. Upon passing the registry examination, the graduate is certified as a Registered Technologist, Radiographer R.T. (R) ARRT and is eligible to apply for active membership in the American Society of Radiologic Technologists.

Radiologic Technology is a rewarding paramedical specialty, using x-ray and other imaging modalities for diagnosis and treatment of disease and injury. Advances in medicine and constant expansions in hospital and health services are creating increasing demand for the services of the well qualified Radiologic Technologist. As a result, qualified radiographers are generally well-placed in the job market after graduation.

The importance of the Radiologic Technologist's contribution to medicine and the increasing demand for services, establish the technologist in an employment situation affording vocational security and a salary which compares with other paramedical group.
